

■ グラム陽性球菌

Table showing antibiotic sensitivity data for Gram-positive cocci. Columns include drug names (e.g., PCG, ABPC, CEZ, CMZ, IPM, ABPC/SBT, GM, ABK), bacterial names (e.g., S.aureus(MRSA), E.faecalis, CNS), and sensitivity percentages for each year (2021-2024). Rows are grouped by bacterial species and drug class.

■ 肺炎球菌＋溶血連鎖球菌＋Haemophilus

Table showing antibiotic sensitivity data for pneumoniae, streptococci, and Haemophilus. Columns include drug names (e.g., PCG, ABPC, CTX, CFPM, CDTR, MEPM, CVA/AMPC, EM, MINO, LVFX, ST), bacterial names (e.g., S.pneumoniae, S.pyogenes, S.agalactiae, H.influenzae, H.parainfluenzae), and sensitivity percentages for each year (2021-2024).

■ グラム陰性桿菌(腸内細菌科)

Table showing antibiotic sensitivity data for Gram-negative bacilli in the enteric family. Columns include drug names (e.g., ABPC, PIPC, CEZ, CTM, CTX, CAZ, CFPM, CMZ, FMOX, CCL, CFPM), bacterial names (e.g., E.coli, S.marcescens, P.mirabilis, K.pneumoniae, P.stuartii, E.cloacae, M.morganii, K.oxytoca), and sensitivity percentages for each year (2021-2024).

■ グラム陰性桿菌(ブドウ糖非発酵科)

Table showing antibiotic sensitivity data for Gram-negative bacilli in the non-fermenting family. Columns include drug names (e.g., PIPC, CAZ, CFPM, CZOP, AZT, IPM, MEPM, DRPM, SBT/CPZ), bacterial names (e.g., P.aeruginosa, Acinetobacter sp.), and sensitivity percentages for each year (2021-2024).

■ グラム陽性桿菌＋その他

Table showing antibiotic sensitivity data for Gram-positive bacilli and others. Columns include drug names (e.g., PCG, ABPC, CTM, CTX, CCL, IPM, GM, CAM, MINO, LVFX), bacterial names (e.g., Campylobacter), and sensitivity percentages for each year (2021-2024).

数値:感受性率(%)=S/S+I+R
